

AXISCADES is a leading, end to end engineering and technology solutions company. We bring expertise that caters to the digital, engineering and smart manufacturing needs of large enterprises. With decades of experience in creating innovative, sustainable and safer products worldwide, AXISCADES delivers business value across the entire engineering lifecycle.

AXISCADES Technologies Limited is currently looking for **Flight Domain Associate Full Stack Developer (Angular and Java Experience)** to join the company in **Bengaluru, KA**. As a Software Engineer, you will be part of the software team, which develops software applications and products that create direct value to its customers. We provide re-vamped work environments focused on delivering data-driven solutions at a rapidly increased pace over traditional development. Be a part of our passionate and motivated team who are excited to use the latest in software technologies for modern web and mobile application development. Through our products we deliver innovative solutions to our global customer base at an accelerated pace.

We are looking for full stack developer who are very proficient in Angular Front end and Java backend tech stack, 3+ years of experience in Angular based development projects.

Position Responsibilities:

- Estimate user stories/features (story point estimation) and tasks in hours with the required level of accuracy and commit them as part of Sprint Planning.
- Contributes to the Backlog refinement meetings by promptly asking relevant questions to ensure requirements achieve the right level of DOR.
- Works with the Product Owner to confirm that the code and acceptance tests reflect the desired functionality.
- Raise any impediments/risks (technical/operational/personal) they come across and approaches Scrum Master/Technical Architect/PO accordingly to arrive at a solution.
- Update the status and the remaining efforts for their tasks on a daily basis
- Ensures change requests are treated correctly and tracked in the system, impact analysis done and risks/timelines are appropriately communicated.
- Develops working software towards committed Team PI Objectives and Iteration plans.
- Delivers working software in accordance with expected quality standards.
- Designs for testability: Design and evolve the system to support testability and test automation.
- Works on prototyping and evaluates technical feasibility

Employer will not sponsor applicants for employment visa status.
