

CADES sets up nearshore Engineering Center in Toulouse, France

Toulouse, 17th December, 2012:

CADES, a leading Indian Engineering Design Services and Technology provider, today announced the setting up of a nearshore engineering delivery centre for aerospace and defense customers in Toulouse, France. This facility enables CADES to provide effective 'front-office' services to its customers in Toulouse, as well as ramp up in an accelerated manner to cater efficiently to the increasing customer demands and high growth it is experiencing across European region.

CADES, which is part of Axis Aerospace & Technologies, has strong engineering engagements with EADS and its subsidiary Airbus, supporting them on various programs. CADES is a certified E2S supplier to EADS, and has also established an offshore development centre for fuselage development, called AFDCI (Airbus Fuselage Design Centre India), for Airbus in Bangalore, India.

Mr. Robert NARDINI - VP & Head of Fuselage Engineering Center of Excellence, Airbus, who inaugurated the facility said *"I am happy see CADES setting up this nearshore centre. As an E2S partner as well as an ODC partner for Airbus, CADES is a key player in EADS outsourcing strategy. And I am proud to see that outsourcing efforts of EADS assisting in the development of local economy."*

Speaking on the occasion, Mr. Sudhakar Gande, Vice Chairman Axis Aerospace & Technologies, said *"I am proud and delighted to see this facility established. This centre further reinforces our commitment towards our relationship with EADS and Airbus."*

Mr. Gande further added *"As part of our growth strategy, we are increasing our footprint in key markets. This is our second such centre in Europe, the first one being in Hamburg, Germany. We are committed to investing on multiple fronts and are actively scouting the market for acquisitions to expand our offerings in Engineering Services for both the Civil/Commercial as well as Defence/Offset markets."*

About CADES:

CADES is a leading product design and engineering design services company catering to aerospace, defense, automotive & industrial product sectors. With its core competency and domain expertise, CADES is the ideal technology partner for a wide range of engineering solutions. As a global engineering partner, CADES works in collaboration with its clients across the product development lifecycle addressing the growing demands of the industry.

CADES is part of Axis Aerospace & Technologies (AAT) . which is a (AAT) is one of India's leading private sector companies, offering services in the areas of Engineering, Embedded Systems/Avionics, Testing, Manufacturing Engineering and Lifecycle Support to Aerospace, Defense, Automotive, Industrial Products & Heavy Engineering industries. These services are strategically aligned to each other to produce enduring value for customers.

AAT is organized by verticals as well as service offerings. Our integrated service portfolio positions us as a global partner which can seamlessly integrate into customers supply chain, provide a holistic solution to its customers' needs and add significant value to its product development process.
